Written and peer reviewed by cardiologists and other specialists for GPs
Backed by more than fifty years of editorial excellence...

*Medicine Today* (formerly *Modern Medicine*) has been continuously published in Australia since 1957. Its publishers launched *Cardiology Today* to provide a topic-specific, focused publication for GPs that will also be of interest to cardiologists and endocrinologists. *Cardiology Today* delivers a dedicated cardiology environment to showcase products directly to a targeted audience.

Written by cardiologists and other specialists for a GP audience, the peer reviewed editorial content provides authoritative, practical clinical information and is commissioned following discussions with the Editorial Advisory Board and other senior consultants. All invited authors hold senior roles in their respective fields of medicine.

The specialty of cardiology is changing rapidly, with new information, research and products constantly becoming available to GPs. *Cardiology Today* brings the most important clinical information to the forefront of doctors’ minds in a quarterly peer reviewed publication devoted to cardiology.

From the Editor-in-Chief...

What is *Cardiology Today* about and why does it matter to both GPs and cardiologists?

Despite the fact that cardiovascular disease remains the number one cause of mortality in Australia, improvements in acute care mean more patients are surviving cardiac events. The number of patients with chronic cardiovascular conditions is likely to increase as our population ages, accompanied by an increasing prevalence of obesity, diabetes and associated vascular complications.

Our patients are provided with a proliferation of both interventional and medical therapies for the prevention and treatment of myocardial, coronary, valvular and arrhythmic diseases.

Keeping up with developments in acute and chronic cardiovascular conditions challenges all of us who engage in frontline patient care.

*Cardiology Today* is designed to help the Australian GP readily access up-to-date clinically relevant information prepared by experts across all domains of cardiovascular disease. The articles are easy to read and have been carefully reviewed by an editorial board of cardiologists and GPs, as well as other specialists outside the editorial board, to ensure the tone and content meet the busy practitioners’ needs. The articles include content focusing on acute care, ECG interpretation and clinical case studies covering diagnosis and management of common and less common but interesting conditions. Our goal is to provide primary healthcare professionals with an understanding of the latest developments in cardiovascular disease, and to support and enrich their daily practice.

Associate Professor David Brieger
MB BS, PhD, FRACP, FACC
Editor-in-Chief and Chair of the Editorial Advisory Board, Cardiology Today

**Biography**

Professor David Brieger is an interventional cardiologist and Head of Coronary Care and Coronary Interventions at Concord Hospital, and Professor of Cardiology at the University of Sydney. His particular clinical interests include coronary disease and atrial fibrillation and he practices across the full spectrum of cardiac disease. He maintains an active research interest in new antithrombotic drugs for cardiac conditions and the promotion of high quality care for patients during and following their hospitalisation.
What our peer review process means to you...

Providing accuracy, credibility and independence, the peer review process is an indispensable part of Medicine Today’s editorial process. Borrowing from this proven method, every article published in Cardiology Today has been rigorously peer reviewed by two expert consultants and by one GP, who represents our main readership.

The reviewers provide instructive comments, suggestions and recommendations on the suitability for publication of each article. Authors receive detailed reports requesting revisions and responses to the comments before articles are accepted for publication.

The result is a consensus on each cardiology topic – meaning you can be sure your product message is delivered in the most credible, authoritative environment available to reach your target audience.

Every article is a basis for action, providing doctors with the most relevant, insightful and accurate consensus information achievable.

Editorial Advisory Board ... behind the scenes

Having major input into Cardiology Today’s peer review process, commissioning program and author suggestions, the Editorial Advisory Board has a vital role in maintaining the journal’s high editorial standards. The Board comprises key cardiologists (interventional, subspecialist, general/rural), a cardiothoracic surgeon and GPs as its members.

Article Reprint Options

You are the company you keep. Keep good company.

We know that doctors trust information from authoritative, credible and independent sources and that this influences their opinions and prescribing habits. In fact, 71% of doctors say that reprints from peer reviewed journals influence their prescribing habits.

Cardiology Today in conjunction with Medicine Today offers you a number of reprint opportunities:

• Single article reprints
• Sponsorship of article collections and supplements

An article reprint collection or supplement builds a collection of articles on a specific topic, giving doctors the chance to gain a comprehensive understanding of that subject and providing you with exclusive advertising rights.

Collections and supplements are distributed to the Cardiology Today readership piggy-backing an issue of the journal along with Medicine Today.

Mechanical Specifications

Cardiology Today prefers ad material via Quickcut, a service provider for electronic delivery of digital files that has proven to be the most effective method of receiving and tracking your ad. As Quickcut provides the facility to check for errors, Cardiology Today recommends that you use this service to avoid print errors.

Material delivery
- Quickcut – visit www.quickcut.com.au for more information
- Via email (up to 15 MB only) to:
  prueanderson@medicinetoday.com.au
  chereelloyd@medicinetoday.com.au
  maria@medicinetoday.com.au
- CD

Material instructions
- Publication name (Cardiology Today)
- Issue date
- Key number
- Ad size
- Special instruction/positioning

Electronic File Requirements (Hi-res Acrobat PDF only)
Hi-res PDFs must be supplied with a minimum of 3 mm bleed and visible crop marks. Colour bars, crop marks and registration marks must be at least 5 mm away from trim.

CHECK LIST
Screen
- Four colour – 133 lines per inch

Colour
- Hi-res PDFs must be supplied in CMYK
- RGB, PMS and Spot colours must be converted to process colour
- Total ink weight should not exceed 310% with a 90% black maximum

Images
- CMYK
- EPS or TIFF format
- Hi-resolution required, minimum of 300 dpi at 100% scaling
- Black and white line art, minimum 1200 dpi at 100% scaling
- All transparencies must be flattened

Type
- Postscript fonts or outline fonts should be used – do not use TrueType fonts
- All fonts should be embedded
- All live copy must be kept 10 mm from all edges
- Any type less than 10 pt bold is not suitable for reverse printing
- Body copy text that is black should be set to 100% black, not a 4 colour makeup of black
- Solid black background areas should have an additional 30% of cyan tint to provide additional density

Proofs
- Supply a 3DAP digital colour proof of the artwork at 100%. Note. Cardiology Today cannot be held responsible for colour discrepancies in print if there are inaccuracies in electronic files supplied to us or if an industry standard proof is not provided. If further technical information is required, visit: www.3dap.com.au

Although the internal production process may verify that material is within specification, the onus is placed firmly on the tradehouse/sender to supply material to specification. It is also a requirement that advertising material is delivered on time so quality control measures can take place. Late material may miss these checking procedures that could pick up possible problems/errors.

Important Notes for Designers of Double Page Spreads (DPS) – Saddle Stitched
- DPS must be supplied as two single pages, left and right
- Include 3 mm bleed on all edges
- Avoid running type across the gutter on a DPS
- Spacing of letters in headings or large text should clear the gutter
- All live copy must be kept at least 10 mm from outer edges

Booking and delivery of material:
Prue Anderson, Group Sales & Marketing Manager
Sarah Wylie, Sales Manager
Cheree Lloyd, Sales & Marketing Coordinator
