FOREWORD FROM THE SUPPLEMENT EDITOR

Although many older people fear dementia, few realise that much can be done to reduce their risk of developing this fatal disease. Clinicians, GPs and specialists alike can lead the way in raising awareness and this *Focus on dementia* supplement will help us to do that. We should no longer accept that many individuals with cognitive disorders remain undiagnosed or are inaccurately diagnosed. We need to identify who is most at risk, including people with diabetes, and ensure they receive the best postdiagnostic care and support.

There is significant overlap between depression and cognitive disorders, and clinicians are responsible for disentangling and managing both conditions. Although current treatment options for dementia are limited, they are expected to rapidly expand in the near future, with amyloid-targeting therapies already in extensive use overseas and likely to become available in Australia soon. Until then, the four symptomatic drugs we have available can be more extensively and effectively used. From the conspiracy of silence to detection, accurate diagnosis and increasingly effective therapies, cognitive disorders are now following the same trajectory seen with cancer diagnosis and treatment 50 years ago. As clinicians, we need to stay informed and engaged in this journey because some 1.5 million Australians with cognitive disorders are relying on us.

Associate Professor Michael Woodward AM, MB BS, FRACP
Director of Dementia Research at Heidelberg Repatriation Hospital, Austin Health; Director of the Memory Clinic and Chronic Wound Management Clinic at Austin Health, Melbourne; a Geriatrician in private practice; and Associate Professor of Medicine at the University of Melbourne, Melbourne, Vic.

CONTENTS PEER REVIEWED

Mild cognitive impairment and dementia: detection and diagnosis 2

MARK YATES, STEPHANIE DALY, MARITA LONG, CONSTANCE DIMITY POND,
 HENRY BRODATY, CAROLINE GIBSON, LEE-FAY LOW

CPD

Mild cognitive impairment and dementia: postdiagnostic and ongoing care 7

LEE-FAY LOW, STEPHANIE DALY, MARITA LONG, CONSTANCE DIMITY POND,
 HENRY BRODATY, CAROLINE GIBSON, MARK YATES

Diabetes and cognitive impairment – a forgotten association? 13

CHIH YING KO, ROGER CHEN

Depression – recognising the signs in older people and in dementia 16
